

TRAVELLER INSIGHTS TRENDS PATTERNS (2019-2024)

1. PROJECT OVERVIEW:

The **traveller insights trends patterns** highlight worldwide tourism trends from 2019–2024. It tracks tourist arrivals, spending, seasonal travel, transport satisfaction, and traveller profiles. Interactive filters (year, visa type, season) allow deeper exploration of travel behaviours. This unified view supports tourism boards, agencies, and policymakers in making data-driven decisions.

2. OBJECTIVES:

1. **Top 10 Countries by Tourist Arrivals** – Identify leading destinations and monitor shifts in global tourism hotspots.
 2. **Total Trip Spend by Year** – Track annual spending patterns to assess recovery and economic impact post-2020.
 3. **Trips by Season** – Understand seasonal preferences to optimize tourism campaigns and resource allocation.
 4. **Satisfaction by Transport Mode** – Compare traveller satisfaction across transport options to guide service improvements.
 5. **Traveler Segmentation by Trip Type** – Profile traveller categories (solo, family, group, business) for targeted strategies.
 6. **Traveler Distribution by Purpose of Visit** – Analyse reasons for travel (leisure, business, medical, cultural) to identify emerging niches.
-

3. DATA SOURCES:

Time line:2020-2024.

Domain: travel details

4. DATA CLEANING (PREPROCESSING):

The following preprocessing steps were performed to ensure data quality:

- Handled missing values
- Removed duplicate records
- Corrected and changed data types
- Renamed columns for better readability
- Delimit the columns
- Sort and filter the column
- Ensured uniqueness across key identifiers for reliable aggregation.

TOOLS USED:

- Excel
-

5. DATA ANALYSIS & MODELLING:

- Applied Excel functions (IF, AVERAGE, AVERAGEIF, ISBLANK) to perform conditional analysis, manage missing data, and enhance reporting accuracy.
 - Used Excel's Data Analysis Toolpak to calculate mean, median, and mode for dataset summarization.”
 - Created relationships between tables using data modelling to integrate datasets and enable comprehensive analysis.”
 - Created PivotTables in Excel to organize data and perform deeper analysis for actionable insights.
-

6. KEY FINDING:

- Country wise tourist arrivals
 - Year wise total trip spending
 - Season wise trip distribution
 - Transport mode wise satisfaction level
 - Traveler type wise segmentation
 - Purpose wise traveller distribution
-

7. ANALYTICAL INSIGHTS DASHBOARD:

Delivered a final dashboard summarizing key findings and enabling efficient, accurate decision support.

Fig. final dashboard

8. KEY INSIGHTS

8.1. DESCRIPTIVE ANALYTICS:

- **France** records the highest tourist arrivals compared to other countries.
- Trip spending dropped in **2020** but steadily increased from **2021** to **2024**.
- **Summer season** shows the highest number of trips, while Autumn and Spring are lower.
- **Air travel** has the highest satisfaction level among all transport modes.
- **Group tours** form the largest traveller segment, followed by families and couples.
- **Leisure/Tourism** is the most common purpose of visit, far ahead of other categories.

8.2 DIAGNOSTIC ANALYTICS:

- France's highest tourist arrivals are driven by strong cultural appeal, historic landmarks, and well-developed tourism infrastructure.
- The sharp drop in trip spending in **2020** was caused by global travel restrictions during the pandemic, while recovery after **2021** reflects reopening and pent-up demand.
- **Summer** shows the most trips because of school holidays, favourable weather, and peak vacation periods worldwide.
- **Air travel** satisfaction is highest due to speed, convenience, and improved airline services compared to slower or less reliable transport modes.
- **Group tours** dominate because they offer cost savings, organized itineraries, and safety for international travellers.
- **Leisure/Tourism** leads as the main purpose since most travellers prioritize vacations, sightseeing, and cultural experiences over business or niche travel needs.

8.3. PREDICTIVE ANALYTICS:

- **France** and other top destinations are likely to continue leading in arrivals, but emerging markets like Egypt and Thailand may grow faster.
- Global trip spending is expected to keep rising steadily beyond **2024** as international travel demand strengthens.
- **Summer** will remain the busiest season, though off-season travel may gradually increase with more budget and niche packages.
- **Air travel** satisfaction will stay high, but improvements in rail and cruise services could shift some traveller preferences.
- **Group tours** will continue to dominate, but solo and digital nomad travel segments are projected to expand with younger generations.
- **Leisure/Tourism** will remain the primary purpose, while adventure sports, education, and medical tourism are expected to grow as secondary drivers.

8.4. PRESCRIPTIVE ANALYTICS:

- Focus marketing campaigns on **France** and other top destinations to leverage high tourist arrivals.
- Strengthen recovery strategies by offering loyalty programs and discounts to maintain the upward spending trend post-**2020**.
- Promote off-season packages in **Autumn and Spring** to balance demand and reduce seasonal dependency.
- Invest in enhancing **air** travel experiences further while improving satisfaction in **rail, road, and cruise** services.
- Design tailored packages for group tours and families, while creating niche offerings for **solo** and **backpacker** travellers.
- Expand **leisure** tourism experiences with cultural, adventure, and wellness options to diversify beyond traditional sightseeing.

9. CONCLUSION:

The dashboard highlights clear global travel patterns: France leads in arrivals, trip spending shows strong recovery after 2020, and summer remains the busiest season. Air travel satisfaction is highest, group tours dominate traveller types, and leisure tourism drives the majority of visits. Overall, the insights confirm tourism's resilience and its central role in shaping global travel demand.
